Announcement

Bioforj Environmental Services is pleased to announce the launching of our Nutrient Management Group from the Waste Management Division. With over a decade of experience in Environmental Projects, Bioforj will bring expertise and technology to the Agricultural Community.

We are packaging numerous products and services to aid your business in reducing costs, to comply with new regulations, and to protect the environment.

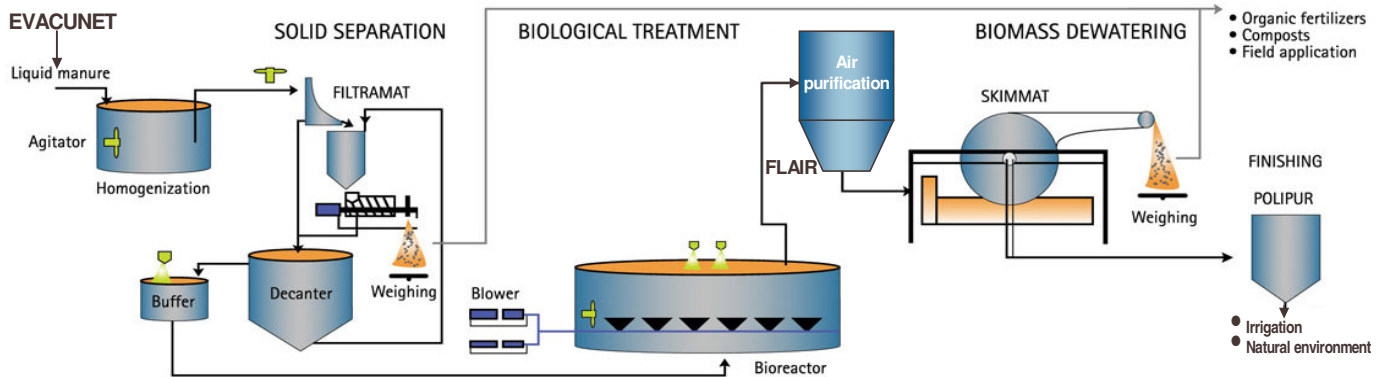

We can assist any business in moving forward in the following areas:

1) Approved Storage Systems

- Geosynthetic Clay Liners (GCL) for
 - secondary containments
 - lagoons
 - compost containments

2) Nutrient Treatment Systems for

- liquid/solid manure
- effluent water
- dewatering/solid separation utilizing Geotubes
- reducing land base requirements
- creating a saleable product (ex. Compost)
- removing pathogens, phosphorous, total nitrogen and suspended solids

3) Odour/Clean Water Management System to

- reduce ammonia/ improve air quality
- increase flock/ herd performance
- reduce/ eliminate odour complaints

4) Consulting Services

- Partnering to provide nutrient management strategies and plans
- Water well drilling products for the decommissioning of old wells
- Global Positioning Systems (GPS) for soil sampling and nutrient management
- We work with your consultant to assist you
